

# accoya exterior

**low maintenance Accoya®-modified wood exteriors - clear Douglas Fir interiors  
fusion of two woods creates a superior product suited to temperate climates**

## **ACCOYA® WOOD**

- Sourced from sustainable forests
- Has zero toxicity
- Has dimensional stability and durability that exceeds the best hardwoods
- Can be used in all outdoor applications
- Resistance to fungus better than teak
- Provides superior resistance to UV degradation
- Low maintenance
- Uses a process called 'acetylation' - adds nothing to wood that isn't already there
- Can take stain very well

## **DOUGLAS FIR**

- Stable wood with low shrinkage
- Resistant against fungal and insect infestations
- Excellent strength capabilities
- Known for its natural beauty
