

Technical Challenge:

- Provided a full series of custom corner windows to meet specific architectural designs, including:
 - Various corner rake sizes and angles
 - Extended jambs made to match color and grain of entire window system
 - Angled upper jambs to match the roofline pitch and interior ceiling resulting in unique compound mitred corner
 - conformance with CSA and BC Thermal requirements

Custom Solution:

- Translated architectural designs into a clean-lined energy efficient custom wood window package
- Worked with glass suppliers to integrate energy -efficient corner panes that can be sealed cleanly
- Used material from one millrun to create engineered jamb extensions matching colour and ring variation seamlessly with the entire window system
